

## **Visiting Policy**

**Many people question, if they can come by to "take a look" or play with our German Shepherd puppies before they are placing a deposit or decide to buy one of them. But it is not possible to offer these possibilities**

**Please understand, you are one of many people (sometimes as many as 20 a day!) Which want to come by to see our German Shepherd puppies for sale.**

**Meeting 20 families daily (!), would be very time consuming for us and there is always a risk that one out of the 20, accidentally brings in a virus or parasite.**

**Differently as a Pet Store, these German Shepherd puppies are raised as a part of our family, where we live with our family.**

**For the safety of our puppies and our privacy, we only meet with families which are ready to purchase a puppy on the same day.**

**We can provide you with a large 5 star testimonials, which got a puppy from us in the past. You can also read our reviews on Google .**

**We only allow the maximum of 2 visitors at our premises, 2 adults and 3 children (well behaved).**

**Visits are limited to 30 minutes for each family.**

**If you are serious about taking a German Shepherd puppy home, we are happy to schedule an appointment with you.**

**Why do we have such a strict visitation policy?**

**Immature immune systems. Until the German Shepherd puppies have all three sets of their vaccinations, (that's when they are 14 weeks old), they are not completely immune against diseases that can be brought in on shoes or clothing.**

***Many breeders have lost entire litters of puppies due to diseases being brought into the breeder's home. You don't have to touch a puppy to transfer a disease to them. Your shoes and clothing can bring it in and leave it on the floor or furniture, only to be transferred to the paws of the mama dog, who then transfers it to her puppies.***

***Most of our German Shepherd puppies are reserved by purchasing families. Would you want to have a puppy reserved and know, that a lot of other families were being allowed to come and hold or play with litter mates, and put them all at risk?***

***We'd like to raise and socialize our puppies in such a way, that their risk to disease and/or injury is as low as possible so that we can deliver healthy puppies to the families who are waiting for them.***

### ***Schedules and Personal Safety***

***We have a normal life that includes jobs/business home and property needs, Horses, Grandchildren, Friends, church and other responsibilities in addition to caring for our puppies and dogs.***

***Our daily lives are very busy and accommodating the many requests we receive from public to come by and visit just isn't possible. This is why visiting is reserved only for those, who have deposits on a particular litter or are interested in purchasing a German shepherd puppy on the same day.***

***We enjoy meeting the families who have reserved a puppy, once the puppies are old enough to safely be visited.***

***BUT it's a totally different situation to receive an email or phone call from a random stranger who is passing through asking to come by and see our dogs and puppies.***

***Not only is this a risk to personal safety, but it would also compromise our home environment, which we appreciate and love and want to protect. Our Dogs are our Lifestyle and we have to control the safe environment, which is also our Home.***

***Thank you for your understanding!***
